Download Getch Vs Getchar

You don't say what system you're using, but as you already have some answers that may or may not work for Windows, I'll answer for POSIX systems.??????????c??????????1??????????fflush?stdin?????????????????????????????????????1?????????????????????????(1)??g
ayn? tip verilerin birbiri arkas?na tan?mlanmas?d?r. Dizi bir kümedir. Ayn? tipte verilere tek bir isimle eri?mek için kullan?l?r.Homework? If so, I won't give a complete answer/ You've probably got buffered input - the user needs to enter return before anything is handed back to your program.
