

# Download Difference Between Aa And Pahoehoe Lava

Most of Hawaii's lava tubes are formed by a type of syrupy flow called pahoehoe. As it pours down the volcano, the lava at the surface is cooled by the air and solidifies, creating an elastic ...A flood basalt is the result of a giant volcanic eruption or series of eruptions that covers large stretches of land or the ocean floor with basalt lava. Picrite basalt, microbasalt is a variety of high-magnesium olivine basalt that is very rich in the mineral olivine. It is dark with yellow-green olivine phenocrysts (20 to 50%) and black to dark brown pyroxene, mostly augite. The world's highest active volcano, Mount Cotopaxi, rises 19,388 feet above the surrounding highland plain in central Ecuador. Mount Cotopaxi is a stratovolcano with an almost perfectly symmetrical cone
