

# Download What Does Sodium And Oxygen Make

Oxygen is the chemical element with the symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds. Salt (Sodium) DOES raise your blood pressure. I went to the doctor and my blood pressure was 130/90. She told me to control my salt (sodium 1500mg limit) and I had a check up two days later with my blood pressure 108/87. Learn to make your own slime with four easy slime science projects for kids. Most use only common household items! Glooze, oobleck & more. The human body contains 60 chemical elements, but we don't know what all of them do. 96% of the body is oxygen, carbon, hydrogen and nitrogen.
